

Welcome to PaintCraft tutorial

Thank you for using PaintCraft. This is a multi-user, multi-touch coloring book. We hope you will get a new experience in drawing pictures alone or together with your friends.

This is the main screen.

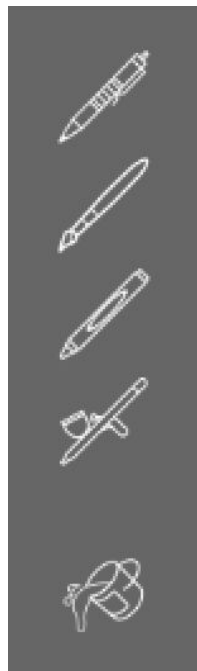

Here you can choose a page or select one of the 4 blank pages to draw from scratch. Don't forget that you can swipe pictures from the left to the right to find new ones.

Then you select a picture you will get to the new screen

On the right side you will find a palette. This palette is scrollable.

On the left side you can get access to the different types of brushes. Just try them and find which one fits better for your style.

Pencil

Brush

Pencil

Aerograph

Bucket (works only with coloring page)

This thing is a brush size slider

This tool is eraser

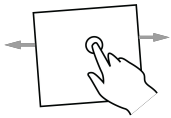

This tool is used to zoom or move your canvas

If you use a mouse, you can use your scroll to zoom in and zoom out, and left button - to move your zoomed canvas.

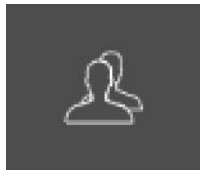

If you are on touch device, you can use standard gestures: pan with one finger or swipe in and swipe out

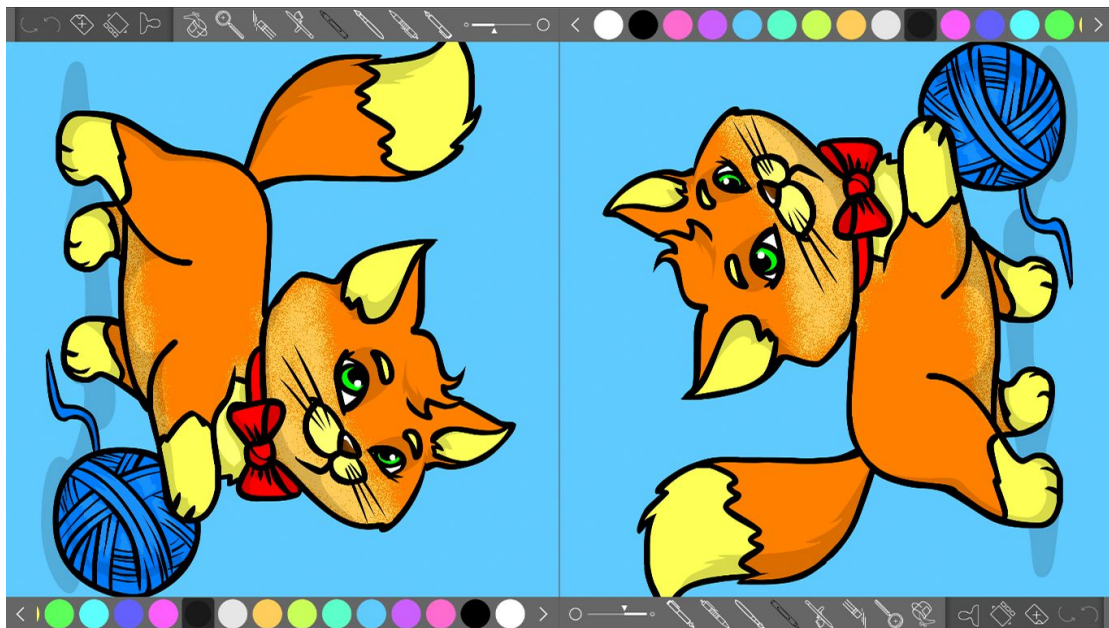

move zoomed canvas at any direction

zoom in and zoom out canvas

This button switches you to the splitscreen mode and back.

In this mode you can draw the same canvas together with your friend. Both of you will have an independent tool and color. If you want to switch back to single view, just press the same button.

This button for clearing canvas to the default state (clear image)

If you made some mistakes, just use Undo and Redo.

Well, now you are ready for coloring your first masterpiece! Click on this button for come back to the Main Menu and choose a new picture.
